

A CIHR-funded postdoctoral position to investigate susceptibility to radiation induced lung disease is available immediately within the Medical Physics group of the IK Barber School of Arts and Science. We seek a highly motivated scientist with the ability to define, direct and complete a project. Specific experience with animal experimentation and bioinformatics would be an asset.

Preferred applicants will have a doctoral degree in biophysics, physiology, or a closely related field and have published in these areas.

Interested applicants may e-mail a CV, publication record, and the names and contact information of three references to: christina.haston@ubc.ca
